## Fair Prize Winners 1924

Following are the prize winners in the Didsbury Agricultural Fair, 1924.

### CLASS 1—STALLIONS

Clydesdale, 2 yrs.; 1, Tom Mor-

ton.

Clydesdale, 1 yr.; 1, Geo. Alden.

Percheron, 3 yrs. or over; 1, H.

M. Eby, Carstairs; 2, A. C. Foat,

Carstairs.

Percheron, 2 yrs.; 1, R. Huber,

Carstairs.

Welsh or Shetland Pony; 1, W.

E. Reider; 2, J. V. Berscht.

### CLASS 2—REGISTERED

#### HEAVY DRAFT

Team hitched; 1, Jos. Hagerty,

Olds; 2, Mrs. Henry Collinge.

Mare with Foal at foot; 1, A.

Kershaw; 2, R. Fulkert.

Dry Mare or Gelding, 3 yrs. or

over; 1, Jos. Hagerty, Olds; 2, N.

S. Clarke.

Filly or Gelding, 2 year old; 1,

J. R. Stevens; 2, R. Fulkert.

Filly or Gelding, 1 year old; 1,

R. G. Gibson and Sons, Olds.

Foal, 1924; 1, Al Kershaw; 2,

R. Fulkert.

### CLASS 3—AGRICULTURAL

Under 1500 lbs. and over 1200,

open to grades only.

Team hitched; 1, S. Wiegand;

2, R. D. Smith.

Mare with Foal at foot; 1, Otto

Klein; 2, Otto Klein.

Dry Mare or Gelding, 3 yrs. or

over; 1, D. Irwin; 2, F. L. Leeson.

Filly or Gelding, 2 year old; 1,

R. G. Gibson and Sons, Olds; 2,

N. H. Featherstone, Olds.

Filly or Gelding, 1 year; 1, R.

Fulkert; 2, R. G. Gibson and

Sons, Olds.

Foal, 1924; 1, Glen Fulkert; 2,

Geo. Alden.

### GENERAL PURPOSE

Under 1300 lbs. and over 1150,

open to grades only.

1, Dan Dippel; 2, Sol. Wiegand.

### CLASS 1—HEAVY DRAFT

Over 1500 lbs., open to grades

only.

Team, hitched; 1, Chas. Pratt;

2, E. Krebs.

Mare with foal at foot; 1, Dip-

pel; 2, E. Cullen.

Dry Mare or Gelding, 3 years

or over; 1, Chas. Pratt; 2, R.

Huber, Carstairs.

Filly or gelding, 2 year old; 1,

R. G. Gibson and Sons, Olds; 2,

R. G. Gibson and Sons, Olds.

Filly or Gelding, 1 year old; 1,

R. G. Gibson and Sons, Olds; 2,

R. D. Smith.

Foal, 1924; 1, E. Cullen; 2, Dan

Dippel.

### G. A. WRIGGLESWORTH

#### SPECIAL

Four horse team hitched, heavy

draft, grades or purebred. Any

two owners can combine for this

prize.

Mrs. H. Collinge and Jos. Hag-

erty, Olds.

### DRIVING HORSES

Foal, 1924; 1, E. O. Wait; 2,

J. V. Berscht.

Dry mare or gelding, 3 years or

over; 1 and 2, Geo. T. Haag, Car-

## Local Crop Conditions

The local crops, with the exception of those that were too severely hailed, are in fine shape and ready or very nearly ready to cut. There is considerable cutting in wheat and barley and next week will probably see a start made on oats.

Several degrees of frost were reported last Thursday but it is not thought there was enough to do any damage. For a while it was very cold and stormy and snow and frost were expected but the snow did not hit here although it was reported at different points further away. The present state of weather however appears more settled and if the frost holds off a little longer there should be some good crops harvested in this district.

## AROUND THE TOWN

Mr. and Mrs. H. Morgan were visitors in Calgary last week end.

Mrs. W. Leadbetter was a holiday visitor in Calgary.

Mr. and Mrs. E. Mertens spent the week end in Strathmore and Calgary.

Mrs. T. Thompson and children were visitors in Calgary over the holiday.

Mr. J. Boorman who has been on an extended visit to England returned this week.

Mr. S. Tighe returned last Wednesday from his trip to Vancouver. He reports having a fine time while away.

Mr. and Mrs. Dan Dippel spent the week end visiting at the home of their daughter, Mrs. Verne Shantz, in High River.

The Women's Institute will meet at the home of Mrs. N. S. Clarke on Friday, September 12th at 2:30 p. m.

Dr. and Mrs. J. L. Clarke and family arrived home from Vancouver this week after spending an enjoyable holiday.

Miss Beatrice Moss will resume her pianoforte classes at Mrs. Smith's home on Saturday, September 6th.

Miss Olive Hyde and Miss Florence Pratt spent a few days in Calgary last week before taking up their duties as teachers in the Didsbury and Crossfield districts.

The W. C. T. U. will hold their regular meeting at the home of Mrs. Ed. Boettger on Thursday, September 11th, at 3 o'clock. All ladies are invited to attend.

Mrs. Ed. Pratt has returned home from the east where she has been visiting friends in Toronto, Ont., and vicinity, Buffalo, N. Y., and Pittsburg, P. A.

Commencing next week, and regularly hereafter, the shows will be run on Wednesday nights instead of Thursdays in order not to bring them to near the Saturday night dances which will be held regularly hereafter.

A former resident of this town, Mr. J. Pirie and son Murray stopped off here for a day last week to look up old friends. Mr. Pirie was on his way back from Vancouver to his home in Senlac, Sask. He reports that business is not very brisk in the coast city.

## IN MEMORIAM

In ever loving memory of our dear little Marjorie, who died September 3rd, 1922.

Mr. and Mrs. D. Sinclair.

## NEVER FIRE FIRST

— BY —  
JAMES FRENCH DORRANCE  
Co-Author of "Get Your Man,"  
"Glory Rides the Range," Etc.  
(Serial Rights Arranged Through  
F. D. Goodchild, Publishers,  
Toronto)

(Continued)

Consciousness must have fled Seymour's mind for just a moment. With its return, he realized that Karmack was shouting excited orders to Koplock, the interpreter. Haunted by that last glimpse of Mokra tumbling forward into the snow, the sergeant tried to raise himself for another look over the tragic stage. Only his brain, seemed awake; body muscles refused to respond to its demand. He could only lie there, staring into the dingy, low-hung sky, and listen.

"Very bad affair this one, boss," he heard.

The voice was Koplock's and the conversational tone, which carried through the frosty stillness plainly, indicated that the interpreter and the factor stood together.

"The red-coat killed her firing at me, you can see that and swear to it, can't you?" Karmack demanded.

"But no, Meestair Karmack," came from the native. "She is hit from the back. It was your bullet that lay her low. Koplock swear to nothing but the truth."

An imprecation sprang from the factor's lips, but scarcely registered with the listening sergeant. He was too filled with rejoicing that no involuntary shot of his had struck her down.

"It don't matter," he heard Karmack grumble. "Go have a look at the policeman. If only she killed him."

Seymour heard the crunch of snowshoes; knew that the native was coming toward him. What should he do? He was convinced that his wound was only a "cruse"; hoped that the muscular numbness would pass. To feign death under the native's inspection was his first impulse.

But to that plan, several objections immediately presented themselves. The mission-schooled Eskimo would be hard to deceive with no more convincing evidence than a bullet graze. Again, there was no telling how long the paralysis that gripped him would continue. No one could lay out in today's temperature for any length of time without freezing.

He recalled that Koplock had always shown a dog-like devotion to him; undoubtedly was grateful for the fees which Seymour had paid for his services as interpreter for the government. Certainly the native was greatly disturbed by what had just happened. To throw himself on the Eskimo's mercy held some risk but more chance of ultimate safety than attempting to play possum.

In the moment of the bronze man's crossing, the sergeant had argued this out and come to a decision.

His eyes were closed when Koplock stood over him and touched his body with the toe of his mukluks. The native stooped for a close examination of the head wound. Seymour's eyes opened, his lips moved in a whisper.

"Stand by your king," he said. "Tell Karmack I'm dead, but don't go on with him."

Koplock assented with a wink and quickly straightened.

"Him passed out," Seymour heard him call to his employer. "Center shot."

"Not so bad," came the unfeeling response from the factor. "That's what he gets for edging into my affairs. Come here, you."

The sergeant heard the native shooing back and then came the caustic instructions of a hard-pressed fugitive who could not afford to lose his head in such an emergency.

## Quickly Conquers Constipation

Don't let constipation poison your blood and curtail your energy. If your liver and bowels don't work properly take CARTER'S Little Liver Pills today and your trouble will cease. For dizziness, lack of appetite, headache and blotchy skin nothing can equal them. Purely vegetable. Small Pill—Small Dose—Small Price.

"I must rush on with my dogs," said Karmack. "Take the girl back to Armitage on her sled. Tell them—oh, make up any story you like; you'll do that anyhow. I'll be where they'll never get me."

"What do with him?" Koplock asked, pointing toward Seymour.

"The cop—let the wolves bury him." Five minutes or so after Karmack's "Mush—mush on!" had signalled his continuation of flight, Koplock again was at the side of the sergeant.

"Him very bad man, that Factor Karmack," he said as he began a vigorous massage of Seymour's limbs. For a moment he worked vigorously to restore circulation and the officer was able to reward him by twitching his fingers.

"Big joke, this on Karmack," went on the native, chuckling gutturally.

"Where's the joke with Miss O'Malley dead?" Seymour demanded, as the Eskimo turned him over to knead his spine. Koplock was too much engaged in his operations to reply readily, then:

"The most big joke him is Miss O'Malley she am not dead but just some hurt like you."

The effect upon Seymour was magical. Power returned to his muscles as suddenly as it had departed from them. Of his own will, he turned over and sat up in the snow. With the Eskimo's aid, he got to his feet. He glanced anxiously over the battle scene, but could see nothing of the beloved figure. His eyes put the question.

"Koplock carry her to tent," answered the native.

"Good boy, Koplock!" Slowly, for his legs were numb, and with the native's grip to steady him, Seymour walked to the tent. There the girl lay wrapped in a rabbit-skin robe, gazing open-eyed at the roof, upon her flushed face an expression of surprise, as if she did not understand just what had befallen her.

"Thank heaven you're alive!" cried the Mountie, staring down at her, his eyes brimming with tears of rejoicing.

"You—you!" she murmured. "Where is Mr. Karmack?" She seemed afraid and her wide eyes accused him cruelly. Seymour sat down beside her. "After nearly murdering you, Mister Karmack has continued his flight," he said. "You and I will thrash this out once and for all, Mokra. The wound of his shot in your back will have to wait until I've cleared your mind of certain apprehensions."

She turned from him, but he felt certain that she would listen. First he assured her of his great liking for her brother, a mutual regard, he believed. Then he recounted every pertinent detail of the brutal strangling with the Ugiuk-line, not forgetting the evidence of the two too-well-curled fox pelts. Frankly, he set forth Karmack's jealous motive in casting her suspicions upon himself. Her own misinterpretation of the scene she had interrupted in the trade room was contented with a convincing account of the entire struggle, ending with Karmack's attempt to shoot him. To prove the factor's real reason for flight, he read her the warrant which the "scarlet special" had brought from Ottawa.

"And to-day," he concluded, "while trying again to kill me, he shot you instead."

Slowly the girl turned her averted gaze. With a glad throbbing of heart, he saw she was convinced.

"And I believed—a thief," she mourned. "I started for the provinces with him that I might the sooner have the law on you. My heart told me—why, why didn't I listen—that it could not be you. Oh, Sergeant Scarlet, can you ever forgive me?"

"Forgiven already—and forgotten, all but Karmack's devilish part," he assured her.

Now, for the first time, the girl noticed the gash across his scalp. "But you—you're wounded. How—how?"

"It's just a scratch," said he cheerfully. "Knocked me out for a bit, you know, but all right now. The how and who don't matter. Suppose we see how slightly you're hurt?"

Koplock stood in the tent door with a pan of boiling water, heated at Seymour's orders. The sergeant took this from him and sent him to bring in the police team. Then, with deft fingers, he set about an examination of what proved to be a shoulder wound.

To his great relief, he found that the bullet had gone entirely through, leaving a clean bore through the muscles, with no need for probing. The girl's coma, so like death as to deceive the excited factor, evidently had been from shock. Applying a first-aid dressing, he bundled the injured shoulder against the cold.

Koplock, with fingers none too gentle, looked after Seymour's own injury and bandaged it with material from the police emergency kit. Then they gathered brush from the thicket and built a rousing fire before the tent.

That they would make no attempt to move that day was Seymour's first decision. The girl, he felt, needed rest after the shock of her wounding more than immediate attention from one with more surgical experience than he possessed. Whether to take her back to Armitage or across country to Wolf Lake required more consideration. The fact that there was a missionary surgeon at the lake who had more skill than Luke Morrow finally decided him. Moreover, by going to the trading post, he would be much nearer the frozen highway of the Mackenzie over which his pursuit of Karmack must continue.

In the afternoon, as they lounged in the tent with the genial warmth of the brush fire playing upon them, Seymour

## Rough Pimply Skin Cleared By Cuticura

You may rely on Cuticura Soap and Ointment to care for your skin, scalp, hair and hands. Nothing better to clear the skin of pimples, blotches, redness or roughness, the scalp of dandruff and the hands of chapping.

Sample Book Free by Mail. Address Canadian Agent: "Cuticura," P. O. Box 1014, Montreal. Price, Soap 25c. Ointment 50c. 10c. Try our new Shaving Stick.

broached one of the mysteries of the eventful winter.

"Mind telling me, Mokra, what brought you on this wild, unseasonable dash into the North?" he asked her.

"It was fear, Sergeant Scarlet—fear for my brother."

He was surprised. "You mean that you had a premonition that something was going to happen to him?"

"Not that exactly," the girl amplified her first response. "There was a motion picture I chance to see in Ottawa. It was a dreadful thing called 'The Perils of the North' or something like that. The young man in the picture, away from all of his own kind—well, you know what might happen. He became a—squaw man. I got to thinking of Oliver. He had dashed off while I was on a visit in Montreal and hadn't even said good-bye. There was nothing really to keep me in the cities and I decided my place was with him. That was why I came and not in time—she broke off with a sob.

Sergeant Seymour assured her that her apprehensions of her brother becoming a squaw man were absolutely unfounded. A cleaner specimen of young Canadian, he declared, had never fared to the Arctic foreshore. But he did not tell her, then, the real reason behind Oliver O'Malley's ill-starred venture.

### CHAPTER XIII. His Montreal Promise

The scene in the rotunda of Montreal's impressive Windsor Station was as lively as it was metropolitan. Trains arrived with their outpourings of passengers, baggage laden, rejoicing at journey's ends in the Paris of Canada. Immigrants, queerly dressed, stood about in huddled groups, waiting to be herded into the cars that would carry them to the wheat lands of Saskatchewan or the green forests of British Columbia. "Red caps" hustled about with the expensive looking luggage of tourists bound back to their own United States with their thrills, for once, thoroughly quenched sans any violation of law.

At one gate to the train shed, an explosive Frenchman bade a fearful farewell to a brother ticketed for Winnipeg. At another, behind a brass guard rail, a tall, upstanding citizen waited with impatience the coming of the Ottawa express. His fur coat was unbuttoned and an open-faced suit of evening clothes showed beneath. In fact, even his oldest friends in the far North might have passed him by without recognizing Staff Sergeant Russell Seymour, on special detail.

The hunt for Harry Karmack, embezzler of the funds of the Arctic Trading Company, Ltd., of course, had not been given up. This was Seymour's "special"—and would be until the fugitive was apprehended, as is the way of the Royal Mounted. Even a report brought to Fort McMurray by a wandering Chipewyan that the factor's body had been found frozen at the foot of Ptarmigan Bluffs had not halted the search an hour. The Indian's story was too "pat"; the last lost-in-blizzard note signed "Karmack" too obvious a plant.

A blizzard there had been, to be sure, a stemwinder. Just in time to escape the white scourge howling South, Seymour had rushed into Wolf Creek Station with his precious invalid. But he could not believe that the Armitage factor had permitted himself to be caught in the storm.

Too long had Karmack been in the North to meet any such tenderfoot fate. An old trick, that of reporting one's self dead by freezing. The thief might have saved himself the expense of hiring the Indian to bring in the "death notice," for all it was believed. (To be continued)

## Flowers Made From Butterfly Wings

Creations of Islington Artist Worth Thousands of Dollars

"Butterfly-bloom" pictures of a kind it would be difficult to equal in excellence have been produced by an Islington watchmaker aged 74.

The artist is F. Moore, known as "The Butterfly King," and his creations are valued at many thousands of dollars.

One "picture" represents a bouquet of dahlia-shaped flowers, the blooms of which are composed of minute petals cut from butterflies' wings. Every petal, the largest of which is little more than half an inch in length, has been cut out by special stamps made by Mr. Moore from watch springs.

In order that the various combinations should match or harmonize in color, the petals of each bloom have been cut from identical portions of the wing of some particular kind of butterfly.

From the damask plumes of the familiar Peacock butterfly, for instance, butterfly-blooms of Indian-red, varying shades of purple, and even black and yellow have been fashioned.

Others of terra cotta, blotched with black and white, have been made from the upper wings of Tortoise-shells. Beautiful variegated "flowers" have been formed from the black-dotted scarlet borders of the underwings of Red Admirals, the wings of male Brimstones supplying the material for pure yellow blooms.

The spotted tips of the wings of "Cabbage Whites" go to form some of the blossoms, whilst many wonderful patterns have been produced by mixing wing-petals from various species of butterflies.

In the centre of each is the protruding head of a butterfly with antennae intact.

It took Mr. Moore six years to complete this particular picture.

Mr. Moore has been butterfly collecting for over 60 years, and is still actively pursuing the hobby.

## Estimating World's Moral Progress

True Opinion Cannot Be Based On Observation Over Few Years

The statement that the world is getting worse is not a new one. Neither did it originate with the present century. The ancient Roman and Greek philosophers bewailed the jazz age in which they lived. Savonarola in the fifteenth century organized the great Burning of the Vanities as a protest against the frivolities and wickedness of the times. In the seventeenth century eminent English divines fulminated against the licentiousness of court life under the Merrie Monarch.

In order to make a fair estimate of the world's moral progress it is necessary to have a long historical perspective. Just as statisticians are not justified in regarding a temporary fluctuation in crop production as a sign of permanent agricultural decline, so the moralist is not justified in basing his opinion on observation over a limited number of years.—Winnipeg Tribune.

## Dinner Wagon Washes Dishes

Mrs. Mary Bolton, an English woman, has invented a dinner wagon which automatically washes the dishes while they are being wheeled into the kitchen.

Mrs. Bolton is the daughter of an inventor, and the great-niece of Sir Humphry Davy, who originated the Davy safety lamp used in mines.

## WRIGLEY'S

after every meal

Cleanses mouth and teeth and aids digestion. Relieves that over-eaten feeling and acid mouth.

Its 1-a-s-t-i-n-g flavor satisfies the craving for sweets.

Wrigley's is double value in the benefit and pleasure it provides.

Sold in its Parity Package.

## Discovered Treasure In Unusual Form

Workman Finds Statues Apparently of Plaster Were Solid Lead

Hidden treasure in an unusual form has been discovered in an old Georgian house in Holloway, which was recently sold for conversion into a garage.

In the garden were eight statues, apparently of stone or plaster, very much in the way, and far from beautiful. The purchaser of the property received an offer from a workman engaged on the premises for one of them, representing a Cupid, and said he might have it if he took it away.

The man, however, found it too heavy to move. An examination of the statues was undertaken, and it revealed the fact that they were made of solid lead covered with several coats of paint. Each of them weighed many tons. With lead at about £33 a ton the owner received more than £2,000 for the lot, and £200 was given to the workman.

Many years ago the house was the private residence of a builder.

## CHILDHOOD INDIGESTION

Nothing is more common in childhood than indigestion. Nothing is more dangerous to proper growth, more weakening to the constitution or more likely to pave the way to dangerous disease. Fully nine-tenths of all the minor ills of childhood have their root in indigestion. There is no medicine for little ones to equal Baby's Own Tablets in relieving this trouble. They have proved of benefit in thousands of homes. Concerning them Mrs. Jos. Lunette, Immaculate Conception, Que., writes: "My baby was a great sufferer from indigestion, but the Tablets soon set her right, and now I would not be without them." Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Thoughtful Of Her

A woman went to buy some cigars for her husband, who was laid up.

"Do you want them mild or strong, madam?" asked the tobacconist.

"Give me the strongest you have," she said. "The last ones he had broke in his pocket."

### Might Be Tempted Anyway

Pauline.—While you are speaking to papa I'll go and play something lively on the piano.

Paul.—I'd rather you didn't. You know some people can't keep their feet still when they hear lively music.

### Canada Forges Ahead

Canada has experienced some very difficult and trying years since the close of the Great War, but it is to be recognized that in this respect the Dominion has not differed greatly from other countries, and, with the possible exception of the United States, this country has fared better than others. Of the great industries to which Canadians devote themselves, agriculture has suffered the most and those engaged in it have experienced the greatest discouragements. Nevertheless, it is agriculture which is responsible for the marked progress which Canada is making in world trade and commerce, and although the volume of Canada's farm production this year will be considerably less than a year ago, the financial return to the producers may not, because of existing world conditions, fall much below last year's figures.

Not only has Canada largely recovered from the after effects of the war without any great disturbances and re-established herself on a firm peace-time basis, but this Dominion has moved forward and occupied a much more prominent and important place in the markets of the world, and, as already noted, the backbone of this development has been agriculture.

The most gratifying feature of Canada's trade development is found in the steadily increasing ratio of exports over imports. During the twelve months ended May 31 last the Dominion had a favorable trade balance of nearly \$200,000,000. During that period the value of Canadian products exported was \$1,069,715,880, while imports totalled \$873,567,752. Exports increased by \$110,000,000 over the preceding year, while imports increased by \$22,600,000. The chief increase in exports was in agricultural products, wood and paper.

In other words, Canada is becoming more and more a self-contained country, while through the development of its own resources it is able to pay its debts abroad in products rather than through the export of money; it is rapidly developing into a creditor nation which inevitably will be reflected in the increased prosperity and wealth of the Canadian people.

Closely allied with this gratifying trade expansion is another and also gratifying evidence of national development and strength. Not so very many years ago the great bulk of Canada's trade both in exports and imports to and from foreign countries passed through English and United States ports. Today Canada's exports to and imports from these countries pass to a great extent directly through Canada's own seaports. For example, export and import trade through the port of Montreal rose from \$326,330,817 in 1922 to \$339,983,136 this year, with the result that Montreal now occupies the proud position of fifth among the great seaports of the world, ranking after New York, London, Liverpool and Hamburg, and being surpassed on this continent by New York alone. Substantial increases are also shown by Quebec, Halifax and St. John.

Even more striking is the growth of trade in and out of Vancouver. Two years ago Vancouver's total ocean-borne trade amounted to \$90,602,896. This year the total is over \$152,000,000. Exports from Vancouver this year are in excess of exports and imports combined two years ago. Vancouver has in recent years rapidly overtaken other ports on the Pacific coast until in tonnage handled it is exceeded by only two of them, and leads the entire coast as an exporter of grain, and this trade is only in its infancy.

Notwithstanding the national shortsightedness of Eastern interests in opposing the completion of the Hudson Bay Railway, that road will eventually be completed and the Bay outlet for Western products opened. When that day comes, and it cannot much longer be delayed, the figures of Canada's trade through its own ports will be substantially increased.

The touring British scientists seem unanimous in predicting that Canada is on the eve of still greater development. They have expressed themselves as wonderfully impressed with the possibilities of the Dominion for continued expansion along agricultural lines, and also in the development of great industries based on the natural resources of the country.

When adverse weather conditions, or temporary economic periods of depression overtake the world, many Canadians become discouraged and talk blue rain. There is not the slightest ground for any such gloomy forebodings. Canada is essentially sound; it is strong and growing stronger; it is enormously rich in as yet undeveloped resources. There is ample reason for confidence, but no room whatever for pessimism. Canadians need to cultivate a little more patience. That, combined with confidence and hard work, will make Canada one of the greatest and most prosperous countries in the world.

### Treasure Is Recovered

Whole Consignment Of Gold On  
Laurentic Has Been Rescued

The discovery of an unexpected storing place in the fore part of the liner Laurentic, which was sunk by a German submarine in 1917 at the mouth of Lough Swilly on the Northern Irish coast, has enabled divers to rescue £250,000 worth of gold bars which had been given up for lost. The divers have been working intermittently for six years to recover from Davy Jones' locker the consignment of £7,000,000 in gold and silver bullion. The whole consignment of treasure has now been recovered.

An aerial defense gas that makes it impossible for anyone breathing it to ascend higher than 6,000 feet is reported to have been invented in Germany.

### Was Friend of White Race

Head Man of Eskimos in Mackenzie  
River District Is Dead

Havink, head man of the Eskimos at the mouth of the Mackenzie River, and staunch friend of the governing white race, died on the delta of the Mackenzie this summer, word of his death having reached Edmonton by travellers who arrived from the Arctic Circle. Havink, besides hunting and trapping and trading with a schooner on the Arctic, was official interpreter for the Mounted Police. He assisted in the capture of the two Eskimos who were hanged for the murder of Roman Catholic priests, and served as interpreter in their trial.

London has no fewer than thirty places of worship where the services are conducted in the Welsh language.

## CHILDREN CRY FOR "CASTORIA"

Especially Prepared for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups. Contains no narcotics. Proven directions are on each package. Physicians every

where recommend it. The kind you have always bought bears signature of

*W. H. Fletcher*

### Best Immigration Agents

Would Send to Britain Those Who  
Have Met With Success in  
Canada

The kind of publicity Canada needs in Great Britain is to send men and women there who were originally from the Old Land and have made good and are happy and contented in Canada to tell of their experience and how to go about emigrating, in the opinion of Mrs. Charles H. Thurnburn, of Ottawa, honorary commissioner on behalf of Canada, to the British Exhibition and Canadian Government delegates to the International Labor Conference, at Geneva, who returned home recently. Mrs. Thurnburn is making a report to the Minister of Labor on the Labor Conference. She paid high tribute to Tom Moore, President of the Canadian Trades and Labor Congress, who, she said, was the sanest labor leader at the conference.

### Ladies Remove Their Corns In A Very Simple Way

No pain, no trouble, costs only a quarter. It is a very simple thing to paint on a small application of good old "Putnam's" night and morning. To remove corns, to get entirely free from them, use Putnam's Corn & Wart Extractor. It is guaranteed, 25c at all dealers. Refuse a substitute.

### Experience Of Air Passenger

As a Napier D.H. express from Paris to London was flying above the channel six distinct storms were visible. "It was the most wonderful sight I have ever seen," said a passenger. "Our plane was in brilliant sunshine, while on all sides were black storm clouds from which rain was falling. The white tops of the clouds towered to a height of from 15,000 to 20,000 feet."

### TRIALS OF INDIGESTION

Common Errors About This Trouble  
Into Which People Fall

Many people so far misunderstand the digestive system as to treat it like a machine; neglecting it until it works sluggishly, then irritating it into work again by the use of purgatives. The stomach needs help at all times, but a study of the process of digestion will show that purgatives, as commonly taken, are seldom necessary and often harmful.

To safeguard your digestion the diet must be controlled. Over-eating is always harmful, but one must assimilate enough food to supply the needs of the blood. Remember, the blood has to carry nourishment to all parts of the body and find fuel for its energy. Hence when the blood becomes weak and fails to do its work, indigestion arises. Therefore the sure remedy for indigestion is to build up the blood. If you suffer from any form of indigestion choose your diet carefully and take wholesome nourishment. Above all, start building up your blood by taking a course of Dr. Williams' Pink Pills. Then under the influence of the new blood supply, your digestive system will respond naturally, your appetite improve and your food will do you good. So begin to improve your digestion by starting to take Dr. Williams' Pink Pills now. You can get these pills from your druggist or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Concentrated Power

In a recent address Sir Oliver Lodge said: With a mass of matter no larger than a man's fist the German fleet could be lifted from the bottom of the sea and set on the hill behind Manchester. After a pause Sir Oliver said, "God forbid that science now should cast its harness over the atomic forces. We are not fit to handle them. Put such a prodigious power into our possession in our present state and with it we would damn the race."

Many infants are infested by worms which cause great suffering, and if not promptly dealt with may cause constitutional weaknesses difficult to remedy. Miller's Worm Powders will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

### Air Pilot Made Daring Rescue

President Ebert has awarded the medal for bravery to Air Pilot Max Tuxes, of Hamburg, for an extraordinary air feat. Last January, Tuxes made a perilous landing on an ice cake in the North Sea, on which was a stoker who had been left as a watchman on a wrecked motorship. The man was half starved and had given up hope of rescue.

### Bay Road In Good Shape

Pictures Taken By F. J. James Show  
Railway In Fine Condition

The natural resources of the country along the Hudson's Bay Railway were described by F. J. James, President of the Southeast Saskatchewan Branch of the On-To-The-Bay Association of Canada, who recently returned to Regina from a trip to Port Nelson on Hudson's Bay.

Mr. James left Regina, July 20, and joined O. D. Hill, Melfort, the President of the northern section of the association, J. A. Campbell, commissioner for Northern Manitoba, and Charles Campbell, a mining engineer, at The Pas. From The Pas the party inspected the mining district of that country, visiting the Rex, Bingo, Wekusko and other well known mines.

From The Pas the party travelled by gas car over the H.B.R. to Kettle Rapids and at this point the Campbell brothers returned south. Canoes were used for the journey from Kettle Rapids to Port Nelson and nearly three days were required to make the trip of about 120 miles. At all points along the route Mr. James took photographs of the country and the conditions of the railway and all of these pictures show that the road bed and the rails are in good condition.

All of the people in the country through which the party passed, feel that they are suffering an injustice through the road not being completed. Starting from Port Nelson in company with an old settler in the district, Mr. James walked for miles along the grade toward Kettle Rapids and he stated that the grade was not in as poor shape as had been reported.

The party spent three days in Port Nelson examining the work already accomplished on the road and getting information on the condition of the country. "Hundreds of white whales were seen in the bay by members of the party and they give an idea of the enormous fishery resources."

### McLaren Knows Vancouver

Worked in City as Timekeeper  
Thirteen Years Ago

Major A. Stuart McLaren and his party, heroes of the attempted world flight by airplane, were accorded a rousing welcome when they arrived at Vancouver on board the Canadian fisheries protection cruiser Thiepvai. City officials, veterans of the Flying Corps, army officers and women and children met the little cruiser and paid tribute to the gallant efforts of the British airmen.

Major McLaren spoke to reporters of his first visit to Vancouver in 1911. "Of course, I was flat broke most of the time," he said cheerfully, "but I know of no country where one can have a better time on less money."

"I landed here with rather less than \$25 in my pocket—and no job. Not being a startling success as a budding business man in England—my people thought I should probably be the very thing for the west, so I came, I saw, and I got a job as timekeeper—and enjoyed every minute of it."

"The contrast of my first arrival here 13 years ago and the wonderful welcome I am now receiving here—well, it's rather overwhelming, you know. It's wonderful to me that since we did not 'make the grade,' so to speak, the people here still take an interest in us. I feel I cannot say enough in appreciation of the splendid aid Canada has given us. Without her aid and the fine assistance of the Thiepvai, it is hardly likely we should be here. The warmth of our welcome here only adds to the obligations of myself and my companions to the Dominions."

### Large Dock At Calcutta

The largest dock in the world is being built at Calcutta. The first section of the dock will involve a total excavation of 40,000,000 cubic feet. Work on the wet dock portion has already resulted in digging about 31,000,000 cubic feet.

Minard's Liniment for Aches and Pains

### Mars Still A Mystery

Will Bring Severe Storm to Earth in  
1926 Says Miss Bart

The planet Mars is just as much a mystery to human knowledge as it has been for centuries, according to Miss Belle Bart, Director of the American Academy of Astrology. Many leading astronomers are of the opinion that the planet would be near enough in August to ascertain whether it is inhabited, what kind of life flourishes there, and whether communication can be established.

Miss Bart, in a statement, announced that the dense ethers surrounding the earth and Mars cannot be penetrated by instruments now in use. Not until 1944, she said, will we be able to learn anything about the perplexing planet.

Mars has a few surprises in store for the earth, according to Miss Bart. In April, 1926, Mars, due to its position in relation to neighboring planets, will cause a storm of electricity such as has never been equalled upon the earth, Miss Bart warns. The storm will be destructive only in certain regions of the world. The demonstration will repeat itself with added intensity in the spring of 1928. In March, 1932, Mars will be in opposition to Neptune and close to the earth, thus causing great electro-magnetic pressure upon the earth, particularly on the Atlantic seaboard of the United States.

Miss Bart predicts that radio will be used in 1944 to prove the existence of inorganic and organic life on Mars. The use of radio waves also will bring us nearer to the solution of the mystery of space, and this in turn will have an important bearing on the probability of the prolongation of human life.

### Muscular Rheumatism Subdued.

When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

### Canadians Return From U.S.

Over Eighteen Thousand Wander Back  
During Period of Three Months

A pronounced return movement of Canadians from the United States is indicated in immigration figures made public.

During the four months of April, May, June and July of the present year a total of 18,870 Canadians returned to Canada from the United States. Of this total 16,166 were Canadian-born citizens, 1,646 were British subjects who had acquired Canadian domicile, and 1,058 were classed generally as "Canadian citizens."

Immigration for the four months showed an increase of 17 per cent. over the same period last year. The total number of immigrants entering Canada from all countries during April, May, June and July was 61,023, as compared with 54,912 during the same months of 1923. Of this total 33,248 came from the British Isles, 7,005 from the United States and 23,770 from "other countries."

In the manufacture of adrenalin crystals, used to rouse the blood pressure in cases of collapse and so on, 50,000 oxen are required to supply the crude material for a single pound. This material is made from a small gland which surmounts the kidney, and was discovered by Takamine, the Japanese medical scientist.

There is a collection of nearly 380,000 finger prints in Scotland Yard.

W. N. U. 1540

## H.B. ROAD MUST BE COMPLETED SAYS MINISTER

The Pas, Man.—"The Hudson's Bay Railway is not a political football. It has been the policy of the Liberal Government ever since the time of Sir Wilfrid Laurier that this route should be developed primarily for the benefit of all Canada, neither for the east nor the west, and Canada has been committed to build the road by both Liberals and Conservatives," declared Hon. W. R. Motherwell, Federal Minister of Agriculture, speaking at a luncheon tendered by The Pas Board of Trade.

"Now, the war has been over five years, and I believe Canada is now capable, financially, of going ahead and completing the Hudson's Bay Railway. The Panama Canal route has always been known to be a 'hot route' for wheat and cattle, but it has been made a success. There appears to be no reason why the so-called 'cold route' through Hudson's Bay should not become a similar success. Any national enterprise is more or less a gamble, and the Hudson's Bay Railway should present no more elements of doubt to our minds than was the building of the C.P.R. I am going over the road with an open mind. Tributary industry along the route would, I believe, be sufficient to warrant the completion of the road as a paying branch of the C.N.R."

"There are two kinds of opposition to the road. First, those opposed to the expenditure of vast sums of money hopelessly; second, the fear of great financial loss to established eastern industry. The road must be completed through the efforts of the western pioneers. I do not know of any certain way of demonstrating the practicability of the Hudson's Bay route except by trying it. The question arises, will the risk warrant the experiment? My mission here now is to get first-hand information."

## Treaty Of Lausanne

France is Fourth Power to Ratify the Treaty

Paris.—The French Senate has ratified the Treaty of Lausanne, re-establishing peace in the Near East with only twenty negative votes. The chamber had voted ratification on Monday.

France is the fourth power to ratify the treaty, which became effective August 6 on its third ratification. Great Britain, Italy and Japan previously had voted their adherence.

### To Plead Case Alone

Victoria, B.C.—Premier Oliver will not be accompanied by Government counsel when he attends the sitting of the Board of Railway Commissioners in Ottawa on September 17. He stated today he saw no need for legal assistance when the board takes up complaints against the restoration of the Crow's Nest Pass agreement freight rates.

### Unemployment in Great Britain

London.—Unemployment in Great Britain has been slowly growing worse in the past six weeks, and last week the number of people out of work had increased by thirty thousand over the number the previous week. The total number of unemployed at present is estimated at 1,123,000.

### Death of E. J. Chamberlin

Ottawa.—Edson Joseph Chamberlin, aged 73, recognized as one of the most competent and successful railroad men in the Dominion and one of the foremost operating experts on the continent, died recently at Pasadena, Calif., according to word reaching the capital. Interment will be made at St. Albans, Vermont.

## Rub It In!

For pain, stiffness, or inflammation apply Minard's and rub it in.

W. N. U. 1540

## United States Is Invited To Disarmament Conference

Geneva.—The League of Nations has extended an official invitation to the United States Government to send an official representative to participate in the deliberations of the disarmament committee, which will be appointed by the league assembly. This initiative, which is unique, is the outgrowth of United States participation in the league's preliminary study to elaborate a convention for international control of the traffic in arms.

## Alberta's Dairy Pool

Vigorous Campaign Will Be Carried On Throughout Harvest Season

Calgary.—All documents for the formation of the Alberta Co-operative Dairy Pool are now in the hands of Attorney-General Brownlee, who met the investigating committee of the provisional board in Banff.

Throughout the harvest season a vigorous campaign of information concerning the advantages and working of the pool will be carried on, and about November 1 a definite drive for the signing of contracts will be launched.

## Seaplanes On Guard

Powerful Planes Will Now Patrol Coast of Britain

London.—Great Britain's coast line will, in the near future, be patrolled and guarded by powerful seaplanes, now under construction for the navy. Each will carry a pilot, navigator, two machine gunners and a torpedo for launching at hostile surface craft.

Still more powerful planes are being built to make longer flights seaward and these will carry five men each.

### Will Affect Civilian Workers

Paris.—The adoption of the Dawes plan, with the consequent inauguration of the Franco-Belgian economic evacuation of the Ruhr, and the return of the Ruhr and Rhineland railways to the Germans, will affect 109,876 civilian workers. Of this number, 88,293 are German railwaymen, 18,395 are French civilians of all classes, 2,903 are Belgians and 281 are auxiliary railway workers of various nationalities.

### No Labor Troubles

Regina.—Saskatchewan has been absolutely free from labor troubles to date during the present year, no strikes or lockouts having been recorded. The nearest approach to trouble was the dispute between the city and its power house employees in Moose Jaw, and this was amicably settled by arbitration.

### To Probe Liquor Exporting

Windsor, Ont.—A thorough probe into the liquor export business along the Essex border will be instituted shortly by the Government, it was learned here. More stringent regulations are in prospect which will make the export business much less profitable than it is at present.

### Trade With Germany Grows

Ottawa.—Canada imported goods from Germany to the value of \$6,041,000 during the year ended July, nearly double the amount of the previous year. Canadian exports to Germany during the twelve months were \$17,941,000, an increase of seven millions over the year previous.

### Egyptian Prisoners Sentenced

Khartum, Egypt.—A court martial, composed entirely of Egyptians and Sudanese, has sentenced three ringleaders in the disturbances which occurred recently at Atbara, to two years imprisonment. Ten other prisoners were sentenced to one year's imprisonment.

### Kindersley Crew Is Safe

Vancouver.—Everyone is safe and comfortable on board the Hudson's Bay schooner Lady Kindersley, according to a wireless message received by the company. The ship is still locked in the ice about 30 miles from Tangent Point, east of Point Barrow.

### Appoints New Ambassadors

Plymouth, Vt.—Appointment of Edgar A. Bancroft, of Chicago, as ambassador to Japan, and of James Rockwell Sheffield, of New York, as ambassador to Mexico, is announced by President Coolidge.

## A Distinguished Visitor

LADY DIANA COOPER

actress and daughter of the Duke of Rutland, one of the distinguished Britishers who came to America to attend the international polo games at Meadow Brook, Long Island.

## Greater Co-operation Needed

President of Manufacturers' Association Makes Plea for Harmony Between All Classes

Toronto.—Greater co-operation between farmer, lumberman and industrial Canada was advocated by Col. A. E. Hatch, President of the Canadian Manufacturers' Association, speaking at the exhibition luncheon here.

"Why cannot the problem of building up Canada be solved by co-operation and compromise?" Colonel Hatch asked. "Our chief national problem is to utilize the raw materials from our great resources in such a way as to give the greatest possible amount of employment to Canadians, and this can be done by manufacturing to the limit of our ability all these raw materials that we now export. We must get to the policy of co-operation among all classes for the constructive development of this country."

## Crop Prospects Improve

Sir Henry Thornton Predicts Total Yield of 300,000,000 Bushels

Montreal.—The west's wheat crop will run at least 300,000,000 bushels this year, Sir Henry Thornton, President of the National Railways, stated when he returned to this city after a five weeks' inspection tour that carried him to the Pacific coast.

"Things are not nearly so bad as they have been represented to the people earlier in the season," said Sir Henry. "Three weeks ago I said the crop would be about 275,000,000 bushels. From later reports that I received I think the harvest will reach certainly 300,000,000 bushels, that is, unless some setback has occurred in the last few days of which I have received no information."

## Favorable Trade Balance

Balance of Trade With U.S. Now More Favorable to Canada

Ottawa.—Canada's so-called balance of trade with the United States is becoming more favorable to the Dominion. In the twelve months ended July, imports from the United States exceeded Canadian exports to the United States by \$143,088,000. In the previous twelve month the excess of imports over exports was \$193,265,000. Canadian exports to the United States in the twelve months ended July, were \$422,810,000, an increase of approximately twenty millions over the previous year; imports from the United States were \$565,899,000, a drop of thirty millions from the previous year.

### Railway Rate Protest

Saskatoon.—The city of Saskatoon will join with Edmonton in its application to the board of railway commissioners for the removal of the discrimination in freight rates existing against the northern parts of the province of Saskatchewan and Alberta in relation to districts on the main line of the C.P.R. where the Crow's Nest Pass agreement is now in operation. It was decided here.

## Would Hold Off Increase In Cargo Rates On Grain

Edmonton.—A request is being made by the Alberta Government that the Ottawa authorities take steps to hold off the increase of cargo rates on grain by the Vancouver Harbor Board until opportunity has been given for a thorough investigation and a hearing at which all interests involved may be represented. Premier Greenfield has sent a wire to Hon. Mackenzie King and the Minister of Marine and Fisheries, in which he asks that they take this action in accordance with previous understandings in the matter.

## Drastic Regulations

Manitoba To Tighten Up On Sale Of Beer

Winnipeg.—Drastic regulations governing sale of beer in the province have been recommended to the Government of Manitoba liquor commission, and the cabinet, at a meeting, passed an order in council bringing the new recommendations into immediate effect. In future no beer can be sold except in glass bottles, the sale of draft beer being entirely cut out. A permit holder is limited to the purchase of not more than 24 quart or 48 pint bottles of beer per week, or, in alternative, he will be permitted to purchase 72 quart or 120 pint bottles of beer per month. The sale of beer in kegs, barrels or anything else but glass is absolutely prohibited.

## Strange Epidemic In Japan

New Disease Is Responsible For Heavy Toll of Life

Tokio.—Several of the most eminent physicians have left hurriedly for the western provinces, where a new epidemic, resembling spinal meningitis, is reported to be raging, causing nearly 900 deaths in recent weeks.

The local physicians call it narcoleptic meningitis. The victims undergo the usual symptoms of spinal meningitis, and then fall into a comatose state, remaining so until death. The mortality is at the rate of 65 per cent.

Japanese physicians say that the cause of the disease is not known. Every summer a few cases have been reported in the western provinces, but never so epidemic or virulent.

## Will Defer Action

Board of Grain Commissioners Consider Changes in Tariff Regulations

Winnipeg.—The Board of Grain Commissioners were in private session here, ostensibly to consider proposed changes in the tariff regulations raised by representatives of the Saskatchewan Co-operative Wheat Producers' Limited.

It is thought likely that the board will defer action on the suggestions until the report of the Royal Grain Inquiry Commission has been laid before the Government. Members of the commission have left for the east.

### High Wheat Yield

Guelph, Ont.—In the experimental plots at the Ontario Agricultural College, winter wheat yielded higher this season than in any other year since 1900. The average yield of grain per acre per annum of 14 varieties grown for the past 29 years is 44.5 bushels, while the average yield per acre for the same varieties for 1924 is 63.4 bushels, or an increase in 1924 of fully 18 bushels per acre.

### First Alberta Wheat

Calgary.—The first sample of this season's wheat was received by George Hill, Dominion grain inspector on August 6th. This came from Barons in the south country, and graded No. 1 Northern. The sample was of good color, the kernels being fine and plump. Mr. Hill stated that the sample was quite as good as any wheat produced in Alberta last year.

### Want West Indian Trade

Ottawa.—While no announcement has been made respecting the appointment of a Canadian to investigate trade conditions in the West Indies, with a view to negotiating a new trade agreement between Canada and that colony, it is probable that Hon. Thomas A. Low, Minister of Trade and Commerce, will go south to carry on the preliminary work.

## ADVANTAGES ALL WITH CANADA IN GROWING WHEAT

Washington.—The Republican campaign text book, which has just been issued, devotes much space to the subject of the "farmer and the tariff," and in this connection dwell on the idea that the tariff rates on wheat have been necessary because the Canadian wheat grower has his competitor in the United States at a disadvantage.

It is declared that the wheat growers of the United States are handicapped as compared with the Canadian growers, not only in cost of production, but in cost of transporting the crop to the world market and that the wheat growers of the United States would be driven from the market in their own country if it were not for the protective tariff. Emphasis is laid on the proposition that the Canadian farmer had the advantage in rail rates.

In general, it is argued that the United States farmer is helped by the tariff rates on agricultural products. Comparisons are made in the Canadian and United States markets to show that the wheat industry in the United States has been helped by the high rates.

## Germany Discharges State Employees

General Reduction Necessary To Aid In Balancing Budget

Berlin.—Four hundred thousand of the 1,600,000 state employees have been discharged in Germany during the past few months under a law providing for a general reduction of officials to aid in balancing the budget. It is estimated that 430,000,000 gold marks will be saved for the Government. General conditions on the labor market are bad, owing to the economic depression in most branches, and it is held improbable that many of these discharged employees can find work elsewhere.

### Compulsory Wheat Pool For Australia

Melbourne.—Announcement of the Government of Victoria's proposal to form a compulsory wheat pool, was made by Premier G. M. Prendergast, at the opening of the Victoria legislative assembly. The Premier also announced that the Government proposed to establish an agricultural bank.

### Stefansson Is Returning

Wellington, N.Z.—Vilhjalmur Stefansson, Arctic explorer and discoverer of the blonde Eskimo, who recently made a trip into the interior of Australia, has sailed for San Francisco on the steamer Tahiti.

### Anatole France Ill

Paris.—Anatole France, 80, who is residing at his Touraine country house, is again ailing, says the Petit Parisien, and is confined to his bed.

## MOTHER OF LARGE FAMILY

Recommends Lydia E. Pinkham's Vegetable Compound to Other Mothers

Hemford, N. S.—"I am the mother of four children and I was so weak after my last baby came that I could not do my work and suffered for months until a friend induced me to try Lydia E. Pinkham's Vegetable Compound. Since taking the Vegetable Compound my weakness has left me and the pain in my back has gone. I tell all my friends who are troubled with female weakness to take Lydia E. Pinkham's Vegetable Compound, for I think it is the best medicine ever sold. You may advertise my letter."—Mrs. GEORGE I. CROUSE, Hemford, N. S.

### My First Child

Glen Allen, Alabama.—"I have been greatly benefited by taking Lydia E. Pinkham's Vegetable Compound for bearing-down feelings and pains. I was troubled in this way for nearly four years following the birth of my first child, and at times could hardly stand on my feet. A neighbor recommended the Vegetable Compound to me after I had taken doctor's medicines without much benefit. It has relieved my pains and gives me strength. I recommend it and give you permission to use my testimonial letter."—Mrs. IDA RYE, Glen Allen, Alabama.

Women who suffer should write to the Lydia E. Pinkham Medicine Co., Copley, Ontario, for a free copy of Lydia E. Pinkham's Private Text-Book upon "Afflicts Peculiar to Women." 0

**BORN:**—To Mr. and Mrs. Lee Persinger on Thursday, August 21, 1924, a daughter Marion Irene.
